

An important message from iKan, KDOT, and the Kansas DMV

We want to inform you of nationwide text message scams in which fraudsters impersonate state agencies, including the Kansas Division of Motor Vehicles (DMV) and the Kansas Department of Transportation (KDOT). These text messages falsely claim recipients owe unpaid tolls and are sent at random to individuals in an attempt to steal personal and financial information. Please note that Kansas tolls are never collected through unsolicited texts, instant messages, or emails.

DriveKS is Kansas' official toll payment system, operated by the Kansas Turnpike Authority. Official communication regarding unpaid tolls or account status will direct you to log into your secure DriveKS account or contact customer service directly. You receive this communication if you've established a DriveKS account and opted in to notifications, either through self-service channels or when contacting DriveKS customer service. You control your communication preferences and can opt out at any time.

What to do if you receive a scam message:

- **Do NOT click on any links** in the text message.
- **Do NOT provide any personal or payment information.**
- **Delete the message** immediately.

Text message scams such as these are successful because they attempt to scare people into acting quickly, often using language like 'final notice' or referencing threatening penalties.
